Pursuant to the Visitor Policy, children under the age of 11 are not required to have a ticket, therefore, they are not affected by the data recording.

The data recording may take place

Sziget Zrt. does not scan the document that contains your facial image being appropriate for identifying you (with the content of the personal data required under Szvtv. 72/C.§ (2)), only reads out the data required by law from it and pastes them by means of a scanner or mobile device or enters manually data that are missing or cannot be recognized with the help of its colleagues, as well as records the facial image of the Visitor exclusively as a cut-out image

ELECTRONIC SURVEILLANCE SYSTEM

Sziget Zrt. installs surveillance and other fixed observation camera systems (i.e. electronic observation systems, cameras) for security at the Festival area. The camera system provides direct (live) and fixed surveillance. The camera system is installed for the purpose of monitoring larger hubs, entry points and cash desks.

The camera surveillance systems are operated in accordance with the provisions of the effective legislation, therefore they are operated in accordance with Act CXXXIII of 2005 on the rules of personal and property protection activities and private investigation and only record footage of events taking place in private areas or areas temporarily taken into private use (without recording sound), and they operate 0-24.

The cameras of the surveillance systems are not the same the festival cameras, you can read more of the latter below.

By entering the venue of the festival, the data subject acknowledges that pictures are taken of him or her and videos are recorded about her or him. Pictogram, and also the Privacy Notice at the venue draws attention to the placement of the cameras. We indicate the place of the cameras on a map which is available at the venue. The detailed rules of the camera system is governed by the non-public policy regarding the camera system performing area surveillance and property protection tasks for Sziget Zrt.

Direct surveillance takes place in all cases via the operative control centre established at the Festival concerned and that is continuously guarded around the clock, which may be entered by authorised persons only. The dedicated colleagues of the security service provider at the Festival are also present at the leadpoints, may give instructions to move cameras that are suitable therefor. During the Festival, Sziget Zrt. stores the footage at the location of the Festival in local servers that are independent of all other systems and are located in a closed, continuously (0-24) guarded area. After the closing of a given Festival, Sziget Zrt. stores the footage at its registered office, in a closed and guarded server room, in accordance with the foregoing, until the data is deleted.

The cameras are connected to the optical network installed by the IT Department of Sziget Zrt., in which network they are connected to a separate dedicated VLAN. This VLAN has no internet or other traffic, its only purpose is to enable communication between the cameras and the servers. The VLAN contains devices with static IP addresses. Locations may be made available through the VLAN only if this is authorised by the IT Manager of Sziget Zrt. This can be done by using the network management software, to which only the persons responsible for operating the network have access. In the Operative Control Centre, the recording, surveillance and management takes place via the Axxon Universe software. At the display locations specified above, we display the images to the competent persons using the CMS3 software. The footage and the Axxon Universe software runs on the camera servers located in the OCC. In order to protect the data, the footage is recorded on HDDs in a RAID set. The system is installed on a separate disk. The Servers are protected with passwords only known to the operators of the camera system.

In the event that someone loses something, he or she has the opportunity to indicate at the same place that he or she is looking for an object and, if someone submits it, the customer service notifies him or her of finding it.

It is also possible to submit the found objects at some of the designated merchant desks, but in such a case, you will not receive any certificates of the submission. The found items submitted at the merchants are collected once a day and are then taken over by the customer service,

records them in the list of items found, and giving them over to the owner is possible only afterwards.

Sziget Zrt. also helps if someone's luggage does not arrive at the airport when traveling to the Festival, but the airport customer service brings it to the Festival venue (in this case, Sziget Zrt. acts on behalf of the airport customer service, as a data processor during the handover of the luggage).

Sziget Zrt. handles as lost objects all those items that have been taken over by the security service upon the entry beside handing a numbered tag (without registering any personal data) from the Visitor because they are forbidden to take into the Festival area under the visitor policy of the Festival but the holder of the numbered tag does not collect the item until the end of the Festival.

Sziget Zrt. prepares a handover-takeover declaration, which the person taking the object over shall sign.</p> <p>It is also possible that the person who has lost an object provides Sziget Zrt. with a description of the lost item personally or via an electronic format operated by the customer service in case the lost object is handed over at the customer service of the Festival.</p> <p>In case the owner of the deeds, documents, objects, or the person who is entitled for the takeover can undoubtedly be identified, as well as the contact details are available for Sziget Zrt., Sziget Zrt. shall notify such person.</p> <p>In case, however, someone else than the owner of the object or the person entitled to take the object over would take the object over, Sziget Zrt. shall hand the processed data over to the investigating authority or the court.</p>
